Experienced Java Developer with 5 years and 6 months of industry experience in designing and developing backend solutions using Java, Spring Boot, and relational databases. Recently promoted to Senior Product Engineer at Speridian Technologies in recognition of consistent technical contributions and leadership capabilities. Proven expertise in microservices architecture, RESTful APIs, and agile practices. Strong communication, problem-solving, and mentoring skills with a passion for continuous learning and innovation. Now seeking to pursue advanced studies to enhance my expertise and contribute to global tech innovation.

PROFESSIONAL EXPERIENCE

Speridian Technologies Pvt Limited

Senior Product Engineer (April 2025 –Present)

Software Engineer (October 2019 – April 2025)

- Promoted based on consistent high performance, mentoring contributions, and ownership of critical microservices.
- As Software Engineer, I was responsible for developing and optimizing scalable backend applications using Java 8+, Spring Boot, and REST APIs, contributing to key client-facing projects.
- Spearheaded performance improvements resulting in 15–20% faster load times using caching and optimization techniques.
- Designed microservices architecture and contributed to cloud-native deployments using Docker, Jenkins, Argo CD, and GitHub.
- Collaborated closely in Agile teams, participating in sprint planning, daily stand-ups, and retrospectives.
- Mentored junior developers, increasing overall team productivity by 25%.
- Led troubleshooting and enhancement efforts for enterprise applications as per client requirements.
- Maintained CI/CD pipelines and ensured timely deployments to production using Jenkins and Tomcat.
- Experience using MySQL, Redis, SQL Yog, and REST API testing tools like Postman.
- Familiar with Redmine for sprint/task management.
- Utilized core **Java** concepts and advanced features to develop high-performance backend systems.
- Experience with IDE Eclipse and Spring Tool Suite.
- Optimized application load times by 15% through implementing caching solutions.
- Experience in building **REST API** using **Spring Boot** and **Postman Application**.

- Revolutionized system application by incorporating Java 8 features, which increased processing speed by 20%.
- Instituted a code review process, enhancing code quality and team knowledge sharing.

TECHNICAL SKILLS

Languages/Frameworks: Java, Spring Boot, Microservices

Databases: MySQL, Redis

Tools: Jenkins, GitHub, Docker, Postman, SQL Yog, Redmine

Others: Eclipse, Spring Tool Suite, Tomcat

EDUCATION

Bachelor of Technology - Computer Science (2015 – 2019)

APJ Abdul Kalam Technological University

CGPA -7.85

Higher Secondary (2013-2015)

Central Board of Secondary Education

CGPA – 7.94

High School (2012 – 2013)

Central Board of Secondary Education

CGPA - 100
